

Job Description: Packaging Design Engineer

iDi Pac is a specialist Packaging and Supply Chain Consultancy operating internationally, with offices based in Hampshire.

Our mission, to support our clients in

*“Solving their product and supply chain challenges through effective design
and pragmatically engineered packaging solutions”*

Our unique combination of in-house expertise, our wide industry experience, and the level of service we deliver is valued by our client base; our clients can rely upon us to look after their brand reputation through the delivery of great solutions that we can all take pride in. We are recruiting for a **Packaging Design Engineer** to aid the project ideation process and support the iDi Pac team to continue to enhance the project delivery excellence our clients have become accustomed to.

As a member of the iDi Pac team you will collaborate with colleagues to support and deliver projects; providing hands-on input from the start. You will be a naturally collaborative team member, providing innovative design perspectives based on your existing industry experience to support the delivery of exciting, stimulating concepts from ‘outside the box’, and are driven by the satisfaction of delivering quality projects that will truly make a difference.

The iDi Pac Culture - You will be required to truly understand the ‘essence’ of the iDi Pac business. Over time, with exposure to projects, you will gain a range of experience to make significant contribution to iDi Pac’s ongoing success.

- To be one team. To share the challenges and celebrate the successes.... “Winning is truly the Best Feeling”
- To impress our customers by listening and responding, seeking always to build lasting relationships through continuous improvement
- To be passionate about our business. As a place to work, enhance iDi Pac as a dynamic environment, brimming with ideas
- To have integrity. iDi Pac encourages an open culture, based upon mutual respect
- To deliver on your promises. iDi Pac aspires to deliver a culture where everyone acts as owners and takes accountability for delivering excellence

Role & Responsibilities Your role will be “To Support and develop the delivery of projects that iDi Pac are commissioned to undertake by their clients.”

- Support the delivery of projects that iDi Pac is commissioned to undertake
- Assist in identifying and supporting the development of other business opportunities for iDi Pac
- Support colleagues through expert technical input and insight in the delivery of their tasks as determined by the Company
- Attend client sites as required, sometimes overseas, in support of the delivery of contracts and projects
- Support the Company to allow effective management and maintenance of Company assets and facilities; project admin, timesheets, expense forms etc
- Ensure that outputs into the client are continuously of a quality and standard that has become a trademark of the detailed approach adopted by the Company

Key Requirements - A key part to your success in this role will be your technical ability and aptitude, your naturally innovative approach to problem solving and your personality.

- Degree level education (Engineering or Design based) or other significant industry experience
- Minimum of 3 years’ experience within the Packaging industry
- An obvious interest in Pack Engineering and desire to make things “better”
- Drive to deliver excellence in projects.
- Excellent creative design skills
- Ability to multi-task and work under pressure
- Dynamic and outgoing personality; self-motivated, an innovative thinker
- Able to work on own initiative; self-critique project output, and identify personal development opportunities
- Collaborative team player
- Excellent presentation skills; language and written English with focus on detail
- IT skills in MS Office

- Valid UK driving license and EU Passport
- Willingness to travel & work away from our office in Hampshire on occasion; UK and Europe

Desirable

- Packaging Diploma
- Mechanical Engineering experience and knowledge
- CAD - Solidworks
- Adobe Creative Suite
- Website design e.g. Wordpress and others

If you have experience in the above and are looking for a well-rewarded challenge with a flexible, friendly, hands-on company, please send your CV and covering letter for review.
